SUMMARY

Frontend Engineering Lead who grew a team from **3 to 9** engineers while scaling a multi-tenant platform to **9M+ users** and **12 enterprise** clients. Expert in React, TypeScript, and frontend architecture, with a record of shipping migrations (82% faster builds) and a configuration-driven design that speeds client onboarding.

KEY ACHIEVEMENTS

- Progressed from Founding React Developer → Senior ReactJS Developer → Sr. Lead Engineer, leading frontend engineering growth over 6.5+ years.
- Expanded the frontend engineering team from **3 to 9 developers**, mentored 6 into senior/lead roles and cut PR review turnaround by 30% through code-review standards.
- Delivered 300+ business modules across insurance, employee benefits, wellness, and claims management ecosystems.
- Led major platform modernization initiatives, including **React 16 → React 18** migration and upgraded the platform to React 19 and Create React App → Vite migration, reducing production build time from 14 minutes to 2.5 minutes **(82%)** and dev-server startup by 45%.
- Onboarded **12 insurance/broker organizations**, enabling scalable growth through configuration-driven and multi-tenant architecture.
- Contribute to organizational growth through interviewed 300+ candidates, hiring, mentoring, and career development of frontend engineers.

WORK EXPERIENCE

FynTune Solution Private Limited, Navi Mumbai, India | Jun 2020 – Present

Sr. Lead Engineer, Frontend — Jan 2026 - Present

- Own frontend architecture, technical strategy, engineering standards, and delivery execution for a platform comprising 300+ business modules, 500+ routes, and 12 insurance/broker organizations.
- Manage and mentor a team of 9 React engineers, driving sprint planning, technical design, code quality, release management, and engineering best practices.
- Spearheaded the onboarding of insurer partners by defining architectural boundaries and separating broker and insurer applications into independent repositories, improving scalability and maintainability.
- Led key platform modernization initiatives, including CRA to Vite migration, bundle optimization through lazy loading and React Suspense & image optimization.
- Introduced AI-assisted development and led the team's adoption through shared prompts, workflows, and code-review guidelines, speeding up feature delivery and test authoring.
- Enhanced the configuration-driven multi-tenant architecture, enabling rapid onboarding of new brokers and insurers with minimal custom development effort.
- Partner with product leaders, business stakeholders, and enterprise clients to translate complex insurance workflows into scalable, configurable digital solutions.

Senior ReactJS Developer — Jan 2023 - Dec 2025

- Promoted to Senior ReactJS Developer to lead frontend delivery, mentor engineers, and drive product expansion initiatives for enterprise insurance clients.
- Expanded the frontend team from 4 to 6 engineers, providing technical mentorship, conducting code reviews, and fostering ownership-driven development practices.
- Led requirement workshops and product demos with CXOs and department heads of enterprise clients, converting their needs into solutions aligned with business objectives.

- Onboarded insurance/brokers and extended the platform to support diverse insurance and employee-benefits workflows, result in cutting onboarding time.
- Delivered 180+ business modules across key domains, including RFQ and plan management, E-Cashless claim journeys, TPA portals, aviation-specific insurance solutions, and flexible employee enrollment experiences.
- Integrated multiple third-party services, including payment gateways, wellness platforms, and TPAs, to extend platform capabilities and improve user experience.
- Contributed delivery and stakeholder management for multiple enterprise accounts, managing requirement analysis, production support, incident resolution, and client communication.
- Led critical modernization initiatives, including the migration from React 16 to React 18, dependency upgrades, and major React Router modernization efforts.

React Developer

Jun 2020 - Dec 2022

- Co-founded the frontend of a digital employee-benefits and insurance platform as one of 3 founding engineers, designing the core architecture and shipping it to production.
- Delivered 80+ business modules that became the foundation of the platform, covering claims management, policy administration, employee enrollment, wellness programs, hospital discovery, and operational workflows.
- Designed and implemented configuration-driven solutions that enabled platform scalability while minimizing client-specific customizations.
- Successfully delivered the first enterprise client onboarding and contributed to platform stability, scalability, and adoption across multiple organizations.
- Led the development and release of React Native mobile applications, launching employee-facing apps on both the Apple App Store and Google Play Store.
- Delivered new insurance offerings, including Cyber Insurance and Travel Insurance, and led a team of 3 engineers to launch the Travel Insurance platform within three months.
- Collaborated closely with backend engineers, product teams, and business stakeholders to deliver enterprise-grade solutions and accelerate product growth.
- Represented the engineering team in product demonstrations and client discussions, helping bridge technical and business requirements.
- Maintained delivery excellence while coordinating distributed teams in a fully remote environment during the pandemic.

KEY SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript (ES6+), Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS, Material UI
Architecture: Frontend Architecture, Multi-Tenant Systems, Configuration-Driven Platforms, Scalable UI Design, Component Architecture
Performance: Code Splitting, Lazy Loading, Bundle Optimization, Image Optimization, Vite, Webpack
Leadership: Engineering Leadership, Team Management, Technical Mentoring, Hiring & Interviewing, Stakeholder Management, Release Planning
Delivery: Agile Development, Enterprise Client Engagement, Production Support, Cross-Functional Collaboration
Tooling: Vite, Git, NPM, REST APIs

EDUCATION

Bachelor of Engineering

University of Mumbai | 2015-2019

- Electrical and Telecommunication Engineering.
